Shanghai

Located at the estuary of the Yangtze River in eastern China and facing the Pacific Ocean, Shanghai - along with neighboring Zhejiang, Jiangsu and Anhui provinces - forms one of China's most robust, open and innovative regions: the Yangtze River Delta.

Hailed as the "Oriental Pearl", Shanghai is an open and inclusive city. While working towards an international economic, financial, trading, shipping, and scientific and technological innovation center, the city has acquired remarkable strengths in global resource allocation, sci-tech innovation, and advanced manufacturing. Shanghai is above all an open hub. In its long-term master plan for 2035, Shanghai will accelerate its modernization pace and become a modern socialist cosmopolitan city with global influence, a more "open, innovative, and inclusive" global city, and a city distinguished for innovation, culture, and sustainability.

WorldSkills Shanghai 2026

Host city: Shanghai, China

Time: 22-27 September 2026

Fundamentals:

Venue

Shanghai has first-class venues for international events, with adequate supporting facilities. The Competition venue will be NECC Shanghai, with an indoor space of 400,000 square meters and an additional outdoor space of 100,000 square meters. This venue has large, mid-sized and small meeting rooms which are all well equipped.

Service support

Shanghai is an aviation hub in the Asia Pacific region. The city has two international airports: Hongqiao International Airport and Pudong International Airport, with airlines flying to and from more than 280 cities around the world. Public transportation in Shanghai is well-developed and convenient. We will arrange airport transfers for clients, and provide shuttle buses for Competitors, Experts, Delegates, and other clients from hotels to venues to ensure easy mobility during the event. There are more than 60 star hotels of various types in the vicinity of the venue, which can provide sufficient accommodation at reasonable rates and a wide range of choices. We will provide a fast channel for the entry and exit of clients, and offer convenience to clients with regard to visa and flight.

Objectives:

China will deliver an innovative WorldSkills Competition with extensive influence, and make it a milestone of the WorldSkills movement.

A more innovative event

Advanced technologies such as big data, artificial intelligence, and 5G will be utilized to make the Competition organization more intelligent and improve visitor experience.

A greener event

Firmly committed to sustainability and adhering to the principle of frugality, we will strive to reduce energy and material consumption during the event while showcasing the development and future of green skills.

A more convenient event

Focusing on competitor service, we will strive to deliver the best participation experience, in part by providing conveniences such as entry and exit facilitation, easy mobility, arranged excursions, and volunteer service.

A more efficient event

We will establish an organizational structure with a clear definition and coordination of roles, and build an operation team whose members all have a high level of professional skills and rich experience in running a large event. In this way, we hope to deliver an efficient and economical Competition.

Embracing the world closely, China sincerely welcomes the entire WorldSkills family to Shanghai in 2026 to share achievements, aspirations, and visions of skills, and thus push cooperation and exchanges further.

WorldSkills Museum

Location: Yangpu Riverside of Shanghai (the former Wing On Storehouse)

Opening: 7 November 2023

Introduction:

Background

The WorldSkills Museum represents a solemn commitment of China during its bidding for the 46th WorldSkills Competition. In June 2018, the Ministry of Human Resources and Social Security of the People's Republic of China, Shanghai Municipal People's Government, and WorldSkills International inked the Cooperation Agreement Regarding WorldSkills Museum to turn the former Wing On Storehouse at Yangpu Riverside of Shanghai into an international museum for cooperation and exchange in vocational skills.

Architecture

The museum site was the former Wing On Storehouse, a historical heritage building dating back to a century ago. It bore witness to the ups and downs of commerce and trade over the last century in Shanghai and was part of the great transformation where skills changed the world. The building is a beamless floorslab structure with reinforced concrete, whose columns are distinctively octagonal with funnel-like capitals. With the establishment of the WorldSkills Museum, this historical building, a unique and valuable industrial heritage, is shining again to pool together worldwide passion for skills.

Content

The WorldSkills Museum collection gathers artefacts that show the central role of skills and skilled workers in human development, social and economic progress, industry, or innovation. There are six permanent exhibition zones, including Tools and our world, Celebrating a successful global movement, Skills development and China, Building a better world with skills, Skills and STEM, Skills and the Industrial Revolution.
