### Forms 5, 5A and 6

I should be grateful if we could receive the promised instructions on the completion of these forms **as soon as possible** as we are holding a briefing weekend for the whole team in the first week of June and I must be able to brief the experts then.

It was clear at Montreal that several other experienced technical delegates were equally unsure and the cause may be the apparent mistake in the formula printed on form 5A. Veijo Hintsanen pointed out that this should apparently read

$$(2) = \frac{\Sigma \text{ score}}{10 \times \text{experts}} \times (1)$$

If so, I should be grateful if a revised form 5A could be supplied.

I recognise that in some trades it will be necessary to change form 6 to take account of the modules but this will take you more time and I can reassure our experts that it will be done.

**Jim Hammer**  
**Technical Delegate**
