

**SHARING THE TREASURE
BEYOND THE
COMPETITION!**

The WorldSkills Foundation (WSF) was established in 2011 with the aim to share the unique talents and expertise of our global network of WorldSkills Champions and Experts, contributing their energy and efforts to projects that can help improve lives around the world.

YOU ARE PART OF IT!

Each WSF project is equipped with highly skilled professionals and supported by strategic global partnerships. In 2013–2014 our projects have focused strongly on the areas of **public health and sanitation**, particularly in less developed countries. Further efforts have been devoted towards **expanding the reach of WorldSkills in Africa**, and promoting **educational reform** through skills training and skills competitions. By collaborating with top TVET institutions, highly-regarded universities and industry partners, WSF also promotes development of **cutting-edge skills training methods** and research to help nurture and build the workforce of the future.
