Dear Sir,

In reply to your letter of 4th October last, we have pleasure in enclosing two examples of our trade descriptions for your information, as well as a recapitulation sheet showing which descriptions are available in English.

In principle, the trade description gives you information on practical and theoretical skill requirements according to the international image of the trade in question, what is required in the way of machinery, equipment, tools and materials to carry out the competition task, as well as an outline of the organisational aspects of the competition, criteria for the awarding of medals and distinctions, etc. The organigram at the beginning of each trade description gives you detailed indication of the contents.

What we propose to send you is a reference document incorporating all the technical requirements for those trades which interest you. This corresponds to sections A and B of each description, sections C and D being common to all trades, for which you only need the text once.

Please let us know whether this corresponds to your needs and which trades should be covered in the above reference document. The costs of providing these documents are borne by the international organisation.

Should you require any further information, please do not hesitate to call on us. We thank you for your interest and look forward to hearing from you.

Yours faithfully,
INTERNATIONAL VOCATIONAL TRAINING COMPETITIONS

R. Gonthier
President Technical Committee

ENCLS.
