Dear Sir

We have been following with great interest your series of International Vocational Training Competitions (International Youth Skill Olympics - IYSO) and would appreciate it very much if we could receive from you information literature, brochures, programmes, list of competition trades, past skill project papers on the competition trades, rules and regulations etc concerning the International Competition series.

2 We would also like to know the procedure and finances that would be involved for a country to seek membership, if necessary, to participate in the Competition series.

3 We also know that you conduct your own local skills competition to select your contestants for the International Competition. It will be greatly appreciated if you could also send us details of the programme and procedure on how you run your Competition, the age group and experience of your contestants, the rules and regulations, the competition trades and project papers etc.

4 Your assistance will be greatly appreciated.

Thank you

Yours faithfully

*S. Sivalingam*
