President Albert greets participating members.

The agenda for the member assembly is discussed in detail and reports are coordinated with a view to ensuring that this assembly can finish its business within the specified time.

There are no motions forthcoming from the committees, so that votes only have an indicative character. Particularly the question of age limit for competitors should not be put to the vote in the member assembly. Otherwise, discussion is possible on all matters.

It is also possible to introduce repetitive motions regarding committee business. In this case - if the motion is accepted - debate on the point in question is referred to a subsequent meeting.

**Decision:** the member assembly is to be authorised to organise a meeting at the end of March 1985. A proposal was put forward in the technical committee to hold this meeting in the Netherlands.
