Dear Mr. Gonthier,

I thank you for previous cooperation, and wonder if I can impose on you again.

We are in the process of attempting to choose candidates for the Skill Olympics in Japan in 1985.

It has been discovered that the job description Industrial Electronics #16, does not have section A in it. We feel that this is a very necessary section because we see from other trade descriptions that it contains an example of a marking scheme from a previous competition and samples of theory questions.

If you could send the missing section to me by air mail, I would be much obliged.

Any other information regarding the competition in Japan would also be most welcome.

Yours sincerely,

*George Henderson*
