Dear Sir

I thank you for your letter of octoberr8th and the pleasant talk we had together at Bern.

I am sorry to say, that I cannot lay before you definitiv propositions. Time was too short. But I shall be glad to say that I am highly interested in our common work concerning the possibilities we had discussed. A special Shell- Cup for good results in the technical professions, for instance concerning a financial support whose further development I can easily imagine.

The details of concrete possibilities and eventual formalities. I have to discuss and to clear with the president of the technical committee.

Regarding your meeting of middle of november, I take the liberty to mark that we are interested to find a solution already for the next International Vocational Training Competitions at Osaka. We know of course that it concerns a Public Relation action of your company, which fulfils for the young trade workers a very favourable aim and which at the same time brings us indirectly the possibility, to further wish a certain aim the development of professional business workers in all trades.

In search of good possibilities, I should be relieved, if you, from your point of view, could give me a possible amount without obligation, that you could propose to those aims for the competitions. Hereby you will get some information and the next constitution, which has been accepted only at the first reading rehearsal.

I thank you for your effort and the contact at Bern, as well as for the ideas to unify aims and ours.

I will be at your disposal for further information.

Yours faithfully

Daniel Sommer
